Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to personal alarm device, classified in class 340, subclass 573.
 - II. Claim 21-37, drawn to environmental sensor alarm device, classified in class 340, subclass 539.28.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the personal locator and alarm device can be used separately without the subcombination system. The subcombination has separate utility such as a weather detector and alarm transmission system.
